OFFICIAL CHALLENGES

Problem Statements

Choose a problem statement, investigate the vulnerability surface, and submit your findings.

PS-01 Hard

Kernel and System Call Security

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-01 Report Bug

PS-02 Hard

Authentication, Access Control, and Privilege Management

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-02 Report Bug

PS-03 Hard

Package Management and Software Supply Chain

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-03 Report Bug

BOSS OS Bug Bounty Programme 2026

Hard

Network Stack, Services, and Firewall

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-04 Report Bug

PS-05 Hard

Boot Process, GRUB, and Secure Boot

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-05 Report Bug

PS-06 Medium

Desktop Environment and GUI Layer

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-06 Report Bug

PS-07 Medium

File System, Permissions, and Storage

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-07 Report Bug

PS-08 Medium

Logging, Auditing, and Monitoring

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-08 Report Bug

PS-09 Med.

BOSS OS Bug Bounty Programme 2026

uration

Identify and report vulnerabilities for this problem statement.

CODE: PS-09 Report Bug

PS-10 Medium

Containerisation, Virtualisation, and Namespace Security

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

CODE: PS-10 Report Bug

Others Open

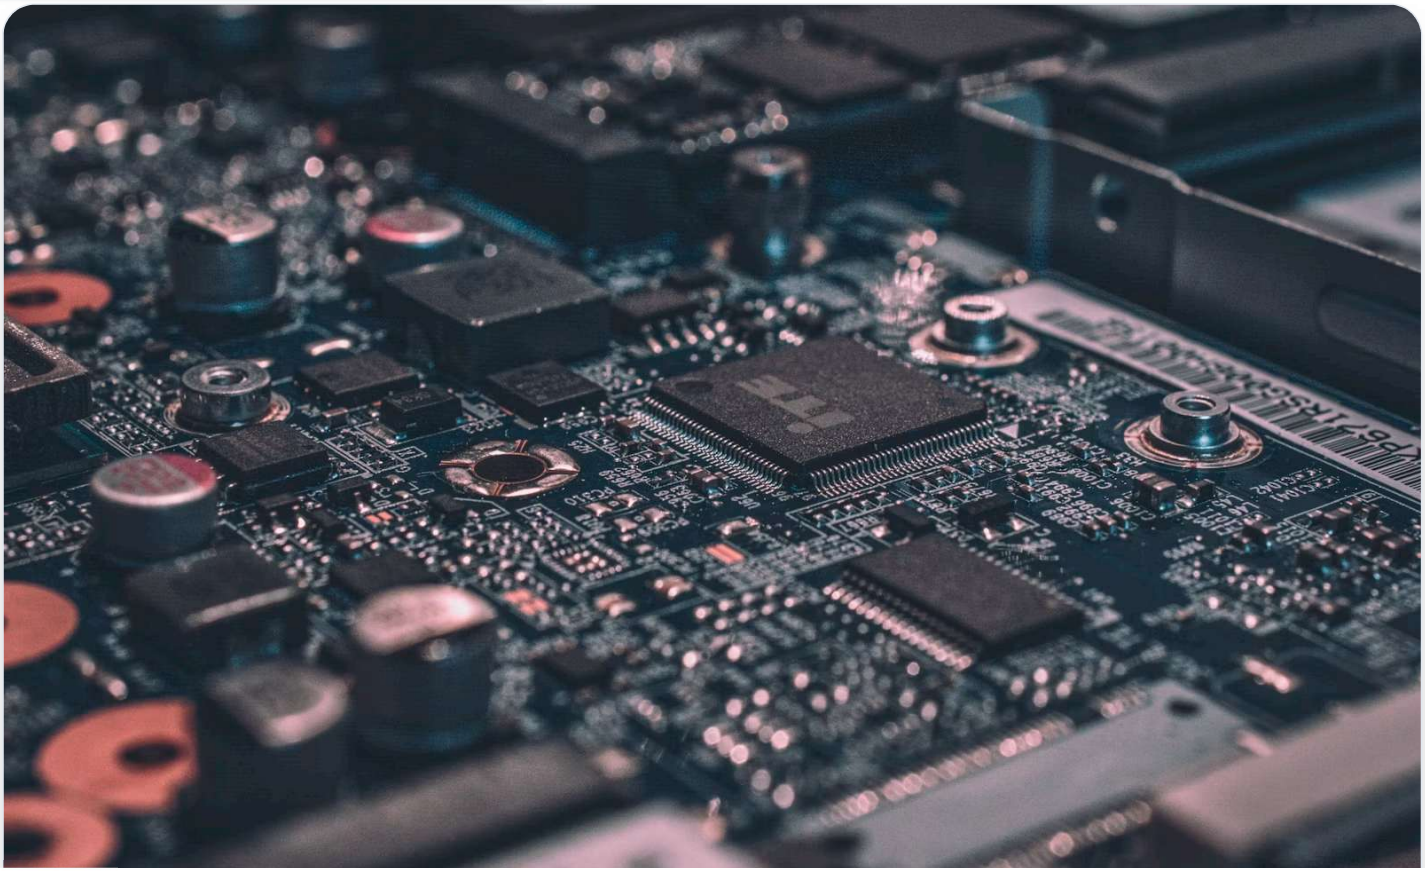

Report a bug outside the 10 listed categories

0 submission(s) received

Identify and report vulnerabilities for this problem statement.

About the Programme

This PAN India Bug Bounty Programme is designed to identify security vulnerabilities in BOSS OS, an indigenous Linux distribution used in government systems. Participants include students, researchers, and professionals working together to strengthen national cybersecurity.

Responsible Disclosure

Responsible disclosure under NDA keeps findings protected throughout submission, triage and remediation.

Real-World Security Testing

Real-world OS security testing helps validate BOSS GNU/Linux against practical attack scenarios.

Note: Your work contributes directly to strengthening national infrastructure.

NATIONAL COVERAGE

Regional Venue Deployment

BOSS OS Bug Bounty Programme 2026

North Zone

Delhi, Punjab, Rajasthan, J&K

- Noida
- Mohali
- Kanpur

Tamil Nadu, Karnataka, Telangana

- Chennai
- Bangalore
- Hyderabad

VENUE WILL BE ANNOUNCED SOON

East Zone

West Bengal, Assam, Bihar

- Kolkata
- Guwahati
- Patna

VENUE WILL BE ANNOUNCED SOON

West Zone

Maharashtra, Gujarat, Madhya Pradesh

- Mumbai
- Gandhinagar
- Indore

VENUE WILL BE ANNOUNCED SOON

Programme Timeline

Follow the official process from registration through triage, scoring and final awards.

BOSS OS Bug Bounty Programme 2026

1

Registration

Portal opens for participants

2

Environment Setup

BOSS OS VM provided

3

36-Hour Bug Hunting

Identify and validate vulnerabilities

CORE PHASE

4

Submission & Triage

Vulnerability report review and verification

5

Results & Awards

Evaluation completed with CVSS-based decisions

Rules & Eligibility

PERMITTED

- Testing only in the provided BOSS OS environment.

BOSS OS Bug Bounty Programme 2026

ıtion.

STRICTLY PROHIBITED

- Testing any real or production systems.
- Denial-of-service attacks of any kind.
- Data theft, exfiltration or unauthorized access to real information.
- Public disclosure before official approval.

Important: Responsible disclosure rules and programme decisions will be binding on all participants.

Evaluation Criteria

Critical	10 points (₹10,000 Per Critical Bug)
High	8 points (₹5,000 Per High Bug)
Medium	5 points (₹2,000 Per Medium Bug)
Low	2 points

1 Critical vulnerability equals 20 Low vulnerabilities.

PRIZE POOL

Awards & Prize Pool

Cash prizes, certificates, CVE recognition and national awards for top submissions.

RUNNER UP

2nd Prize

BOSS OS Bug Bounty Programme 2026

₹ 75,000

Certificates + CVE Recognition + National Awards

CHAMPION

GRAND WINNER

1st Prize

₹1,00,000

Certificates + CVE Recognition + National Awards

SECOND RUNNER UP

3rd Prize

₹50,000

Certificates + CVE Recognition + National Awards

All prize winners receive Certificates + CVE Recognition + National Awards

Empowering the next generation of developers through a secure, collaborative, and innovation-driven digital infrastructure.
